

FINANCIAL PERFORMANCE DASHBOARD

BY : DIVYASHREE K

PROBLEM STATEMENT

- The goal of this Power BI Dashboard Project is to analyze the financial performance of a company using the provided data.
- To create a visually appealing dashboard that provides an overview of the company's financial metrics enabling stakeholders to make informed business decisions.

SECTIONS IN THE REPORT

Report has Multiple Section's from where you can manage the Data, Like :

- Report Data can be sliced by Segments, Country to show Particular Data.
- It has cards showing Total revenue, profit margin, total cost and Net sale .
- It has a Donut Chart with showing sum of sales by country .
- It has a Area Chart showing Months and year on X-Axis and Profit on Y-Axis and heat map showing the segments with sum of units sold.
- At last clustered column chart showing sales, profit and discount by products.
- I have also included a Reset Button at the Top to clear all Slicer's. To use it hold CTRL and then click it to reset the Slicer's.

POWER QUERY AND DAX ANALYSIS

Data was transformation and prepared tool built. To clean and reshape data, and load it into power bi analysis.

By using DAX analysis as being calculated some the columns for deep analysis .
