

TOP INSTAGRAM INFLUENCERS DATA ANALYSIS

BY : DIVYASHREE K

INSTAGRAM INFLUENCER DATA ANALYSIS

Introduction

In this project, we explore a dataset of top Instagram influencers to uncover key trends in social media influence, engagement, and audience reach.

The data includes metrics such as:

- Follower counts
- Average likes
- Engagement rates
- Influence scores
- Posting behavior
- Country-based distribution

By using tools like **MySQL for data querying** and **Python (Seaborn & Matplotlib)** for visualization, we conducted a comprehensive analysis to identify:

- The most followed and engaging influencers
- Patterns in content performance
- Influence versus activity levels
- Regional representation and growth potential
- This analysis helps brands, marketers, and analysts understand the dynamics of digital influence and make data-driven decisions for collaborations and campaigns.

TOP 10 INFLUENCERS BY FOLLOWERS

```
8 • select * from top_insta_influencers_data;
9 • SELECT
10     channel_info,
11     followers,
12     CASE
13         WHEN followers LIKE '%m' THEN CAST(REPLACE(followers, 'm', '') AS DECIMAL(10,2)) * 1000000
14         WHEN followers LIKE '%k' THEN CAST(REPLACE(followers, 'k', '') AS DECIMAL(10,2)) * 1000
15         WHEN followers LIKE '%b' THEN CAST(REPLACE(followers, 'b', '') AS DECIMAL(10,2)) * 1000000000
16         ELSE NULL
17     END AS followers_num
18 FROM top_insta_influencers_data
19 ORDER BY followers_num DESC
20 LIMIT 10;
```

Result Grid | Filter Rows: | Exports: | Wrap Cell Content: | Fetch rows:

	channel_info	followers	followers_num
▶	cristiano	475.8m	475800000.00
	kyliejenner	366.2m	366200000.00
	leomessi	357.3m	357300000.00
	selenagomez	342.7m	342700000.00
	therock	334.1m	334100000.00

DESCRIPTIVE STATISTICS

Metric	Mean	Median	Max	Min
Followers	~77.4M	50.05M	475.8M	32.8M
Average Likes	~1.79M	1.1M	15.4M	65.1K
Engagement Rate	~1.90%	0.88%	26.41%	0.01%
Posts	~3.5K	2.1K	17.5K	10
Total Likes	~3.66B	2.0B	57.4B	18.3M

KEY TAKEAWAYS

- A **higher follower count** generally leads to more likes but doesn't guarantee high **engagement rates**.
- Some influencers maintain **strong engagement** with fewer followers, showing that quality of content and audience connection are crucial.
- **Geographic diversity** shows global representation, but North and South America lead the scene.
- Influencers' **posting volume varies widely**, suggesting different content strategies can still yield high influence scores.
